

MachineTalker's Recent Acquisition Expected to Accelerate Sensor Market Entry

Tiny, Easily Deployed Wireless Sensors to Transmit Information to MachineTalkers® for In-field Analysis

Santa Barbara, CA – January 9, 2008 – MachineTalker, Inc. (OTCBB: MTKN), developer of smart wireless security networks and wireless environmental monitors, today reports that the company's most recent acquisition is expected to accelerate the company's move toward commercialization of its MEMS technology. The announcement of the acquisition of wireless micro-sensor technology dovetails with the company's strategy of pursuing the complete elimination of wires in sensor groups and process control functions.

Able to be randomly placed or "dusted" around a remote area, these wireless microscopic sensors will monitor environmental and biometric indicators and report changes to the local MachineTalker unit which will process and analyze the data. The Talker® can then make decisions based on micro-sensor information and send results along to the appropriate authority.

Roland F. Bryan, MachineTalker's CEO, said "this new technology, which will combine a miniature sensor and radio in one device, is a fantastic technological leap that we believe will allow us to introduce a completely wireless sensor array. Instant deployment of sensors that interact by radio with Talkers in the field will permit random patterns of those sensors and detectors to accommodate a variety of uses. More to the point, the elimination of wires is extremely cost effective."

About MachineTalker

MachineTalker, Inc., has developed a unique technology – smart security networks that allow governments, businesses and individuals to rapidly deploy wireless security networks, tracking systems and industrial process control systems. The Company's proprietary technology enables the wireless networking of intelligent devices for shared processing and reporting of data in remote security and control applications. For more information about MachineTalker, please visit its website at www.machinetalker.com.

Safe Harbor Statement

Matters discussed in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this press release, the words "anticipate," "believe," "estimate," "may," "intend," "expect" and similar expressions identify such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. While reasonably expected, the company can make no assurances that there will be a material increase in actual trading volume. These forward-looking statements are based largely on the expectations of the Company and are subject to a number of risks and uncertainties. These include, but are not limited to, risks and uncertainties associated with: the impact of economic, competitive and other factors affecting the Company and its operations, markets, product, and distributor performance, the impact on the national and local economies resulting from terrorist actions, and U.S. actions subsequently; and other factors detailed in reports filed by the Company.
